- Batch Scripting, Linux CLI, C#, NodeJS, Java, Python
- MySQL, PostgreSQL
- Zesty, Drupal, AWS, Laravel
- Gemini API, AI integration

LANGUAGE

- English
- Tagalog

EXPERIENCE

AI Software Architect
Jan 2026 - Present

Concentrix Inc. | Manila, Philippines

- As a AI Software Architect supporting Google as a client, I lead the architecture and delivery of enterprise applications and AI-driven solutions using Angular, Java, Python, Google Cloud technologies, APIs, and distributed systems. I collaborate with stakeholders and cross-functional engineering teams to deliver scalable, secure, and high-performance solutions while driving AI automation, system modernization, and technical strategy. I provide technical leadership through architecture reviews, technical governance, performance optimization, engineering mentorship, and delivery coordination, helping teams make effective technical decisions and consistently deliver business outcomes.

Professional Software Engineer
April 2024 - Dec 2025

ERNI | Manila, Philippines

- As a Professional Software Engineer, I developed scalable web applications using NextJS, Angular, Laravel, Python, Azure, and various CMS platforms. I collaborated with cross-functional teams to deliver high-performance solutions, develop automation and backend services, and integrate UI/UX designs into functional applications. I applied software engineering best practices through code reviews, technical problem-solving, and mentoring while continuously adopting emerging technologies to improve application performance, efficiency, and user experience.

Packaged App Development Analyst
Sept 2022 - March 2024

Accenture Inc., | Manila, Philippines

- Front End Developer – Banking
- Developed reusable UI components and web pages, resolved bugs, and managed localization while collaborating with an international development team.
- Full Stack Developer – Retail
- Maintained PHP/Drupal eCommerce systems and developed RPA solutions to automate business processes and improve operational efficiency.

Full Stack Developer
Jun 2017- July 2022

LGU Candelaria | Candelaria, Quezon, Philippines

- Developed and maintained an Electronic Business Permit & Licensing System (eBPLS) using PHP, Go, NodeJS, ReactJS, JavaScript, Python, and SQL, supporting business records and permit issuance.
- Developed a vaccination registration and QR code platform using PHP, Go, NodeJS, Angular, TypeScript, and SQL, while providing ongoing updates, maintenance, and client support.
